

# Getting started with Aggregator Middleware

## How does it work?

## Why Aggregator Middleware?

**Less stress with streamlined orders:** You no longer have to manually key aggregator orders into your point of sale system, it's all done automatically for you.

**Centralised menu management:** Setup and manage all your menus, prices, store hours, all from the one place. Update them seamlessly with just a few clicks.

**A greater guest experience:** With automation you eliminate human error, which means no missed or incorrect orders and ultimately happier customers.

## Questions?

Find answers to a number of different questions in the MOBI Help Center at [support.mobi2go.com](https://support.mobi2go.com)

## Troubleshooting

If you're having issues with your aggregator middleware and haven't been able to resolve them using the Help Center, please contact MOBI's 24/7 Customer Support Team at [support@mobihq.com](mailto:support@mobihq.com).
